

GroveBasicShield

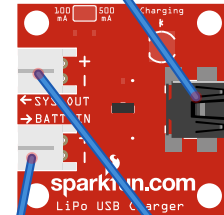

Mount basic shield on LinkItONE

LinkItONE-sim

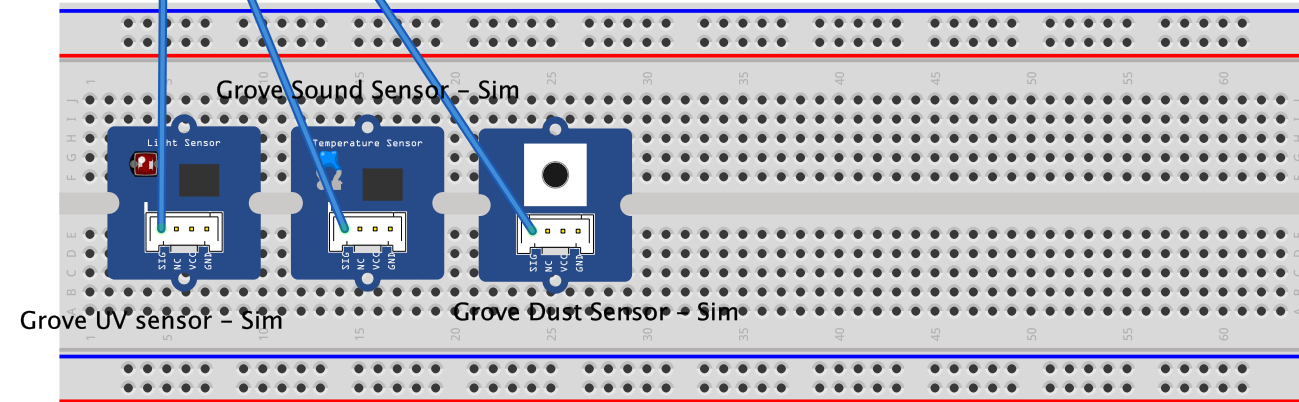

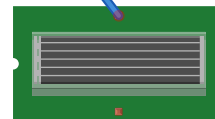

To battery jet

MCUapps LiPo Rider - Sim

MCUapps Solar Plane - Sim

The first step is showing how to make connections between parts without create missing fritzing parts.

Without correct parts, lots of detail can be wrong. But we think it still help people to make cable connections.

The part which named have "Sim", means it's similar part but not the correct one.
